

Opportunity to mobilise 1 day after surgery

Te Tāhū Hauora
Health Quality & Safety
Commission

Source: </measure/opportunity-mobilise-1-day-after-surgery>

Description

This is a measure of whether a staff member tried to begin mobilisation with the patient on the first post-operative day. This is a measure of service delivery and does not measure whether the patient was actually able to mobilise because the patient may still be too unwell after surgery to be able to mobilise.

Measure set

Falls and fractures

Improved recovery (hospital)

Notes about this measure set

Sub-analysis is available using the following filters:

- Te Whatu Ora district
- ethnicity (Māori, Pacific, Asian and Other [including unknown]).

Numerator

The number of people with a hip fracture who had the opportunity to mobilise on day one after hip fracture surgery.

Denominator

The registry population.

Denominator detail

People who had 'Opportunity given day one post-surgery' entered in the Australian & New Zealand Hip Fracture Registry in answer to the question on whether patients were provided with the opportunity to mobilise 1 day after surgery.

Denominator exclusions

People in the registry who did not have a recorded value or had a null value for the question on whether patients were provided with the opportunity to mobilise 1 day after surgery.
